

I am opposed to HR 4026. I appreciate the freedom to listen to what I choose to listen to, and feel it is against our rights as U.S. Citizens to prevent such options. XM radio allows my family to choose and enjoy quality programming, and up to the minute weather and traffic information more frequently than any other source. It allows us to choose to receive information that we would not have access to without XM radio.

Respectfully,

Mark Geinopolos
